

1000W Model Is Joined to GPSA Series

High Efficiency & Long Life

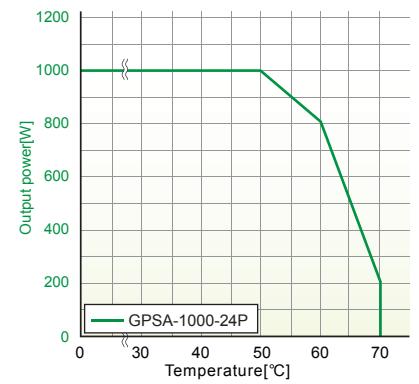

High efficiency decreases heat buildup. Stable operation is available even at high temperature circumstance. GPSA-1000 has approx. 5% higher efficiency and approx. 38% less energy loss compared with competitors' equivalent products.

Compact & Large Capacity

100% output at 50°C. Moreover, operational at 70°C.

Ambient temperature derating

Compactness and high peak power are achieved compared with competitors' 1000W PSU.

Comparison with competitors' 1000W PSU. [At 200VAC & 24V output]

GPSA-1000 Series	Competitor's equivalent A	Competitor's equivalent B
128 150 61 240	150 61 240	150 61 240
Continuous output: 1008W Peak output: 2016W	Continuous output: 1056W Peak output: 1200W	Continuous output: 1008W Peak output: - W

GPSA-1000 Series

Unit type single output power supply

Continuous: 1000W Peak: 2000W

Output voltage: 24/48V

	24V type	48V type	Common spec.
Output voltage	+24V	+48V	+12VSB
Continuous current/power at 115VAC	42A	21A	0.5A
1008W	1008W	6W	
Peak current/power (5s max.) 115VAC	55A	27.5A	0.5A
1320W	1320W	6W	
Peak current/power (5s max.) 200VAC	84A	42A	0.5A
2016W	2016W	6W	

Low Leakage Current & Low Noise

Leakage current is decreased to 0.57 mA at 240VAC.

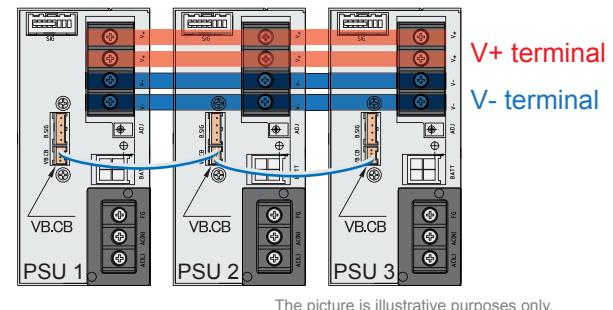

Moreover, conducted emission VCCI Class B is achieved.

No external noise filter saves cost and man-hours.

Parallel Operation Is Available

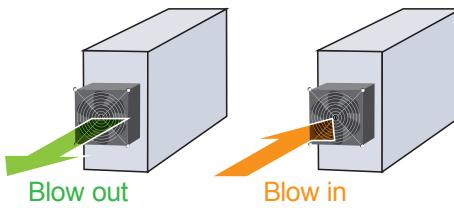

In case of power shortage, output power can be increased with parallel connection. Output voltage and current of each unit can be balanced to deliver stable power by connecting output balancing signal (VB) and output current balancing signal (CB).

Selectable Air Blow Direction

A blow in fan and a blow out fan are available.

Air blow direction is selectable for each application.

Specification GPSA Series

Model name	Input voltage	Output current/power										*1 Efficiency	*2 Leakage current	Size (W x H x D)			
		12V output		24V output		36V output		48V output		96V output
